Sample cheque book

This is a **sample** made from the public practice seed shown on the Bitcheque site. Anyone can recreate it, so it can never hold money.

1. One 24-word seed makes the whole book. It is printed as two parts in **separate print runs**.
2. **Part A** (pages 1–11) holds the payee columns P1–P12 of cheques 0–10.
3. **Part B** (pages 12–22) holds the amount D1–D4, exponent E and fee F columns.
4. For a real book, print on a clean, offline computer with a USB-only printer, print part A and part B separately, keep the two parts apart, and switch everything off afterwards.
5. Each box is one cell: its position (for example P3·5) and its 12 words. To sign, copy the 12 words of the box that matches each digit.
